

Rich River Exploration Ltd.

Mineral Exploration Services

High Potential Mineral Exploration Projects Available

New Finds Make Mines

From grass roots regional exploration to advanced mineral exploration projects.

We have the knowledge, experience and expertise to compliment any exploration program.

Rich River Exploration Ltd. is a full service, modern contract mineral exploration Service Company.

We provide a complete range of services to our many professional associates and corporate industry clients.

We take great pride in providing high quality, expedient and cost effective mineral exploration services to all levels of the mineral exploration industry.

We provide essential services to individual prospectors as well as junior and major mining exploration companies.

We are modern prospectors using modern methods; however we are strong believers in the old fashioned boot and hammer approach.

And we have numerous new discoveries to show for it!

GEOLOGICAL SERVICES

Rich River specializes in grass roots mineral exploration. We love new ideas and we have the expertise to recognize, sample and evaluate mineral potential for any deposit types.

Rich River employs geologists, geological technicians and prospectors. We often use these professional personnel to complete other services, including claim locating, line cutting, geological, geo-technical and geophysical surveys etc.

Some of the related services we supply are:

- Regional stream sediment survey's
- Heavy mineral stream sediment collections
- Pan concentrate sampling
- Lake sediment sampling
- Talus fine collections
- Moss mat samples
- Soil sampling and rock geochemistry
- Mobile Metal Ion's (MMI) Sampling
- Conventional prospecting
- Geological mapping
- Geological data collection and interpretation

LINE CUTTING

The quality of any exploration program is largely based on the accuracy of the base line and/or mine grid.

Rich River's employees are fully experienced in the establishment of any type of grid, often in very rugged terrain.

From chain and compass grids to fully surveyed and slope corrected I.P. Standard lines.

Rich River will do it right the first time.

Rich River provides a variety of other mineral exploration services, often in conjunction with our many professional associates.

Some of these services are as follows:

- Program management
- Camp construction
- Drilling and blasting
- Falling and clearing
- Drill site pads
- Property and drill site reclamation
- Mechanized trenching
- Reclamation

Contact us; we look forward to working with you!
